

# Most Advanced and Flexible Hardened Layer 2++ Multicast TS2 Cabinet Switches

ITS Express switches have been specifically engineered to handle the challenging demands of tough environmental conditions and High bandwidth, Real-time 1080P Multicast environments.

A vast array of redundancy protocols combined with dual redundant power supplies ensure maximum uptime for mission critical applications.

The ITS-8040 provides State of the art Switching Next-Generation ASICs and robust backplane (56GBPS) found on the "best-of-breed" ITS-8012, but at a lower price point.

Network Security, Port-based Network Access Control (IEEE 802.1X) HTTPS Secure Web GUI, SSHv2 for Secure Remote Command Line Login, Rate Limiting, ACL Policies, QOS, TOS, COS. Adaptive Cut-Through Switching Q in Q Vlans

State of the Art Firmware features, which has been designed around the ITS Market and heavy multicast environments

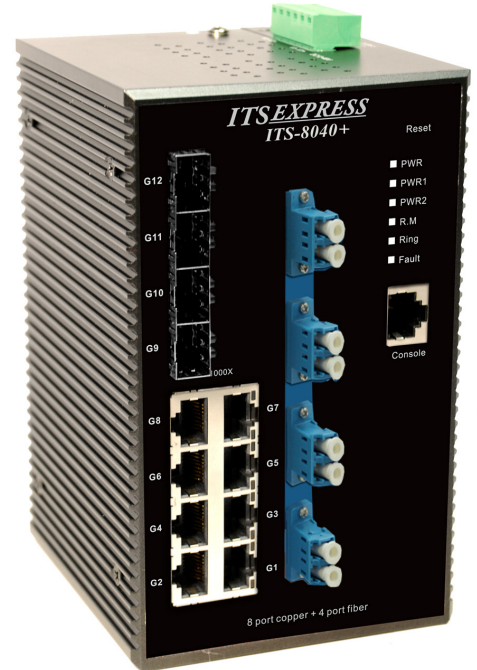

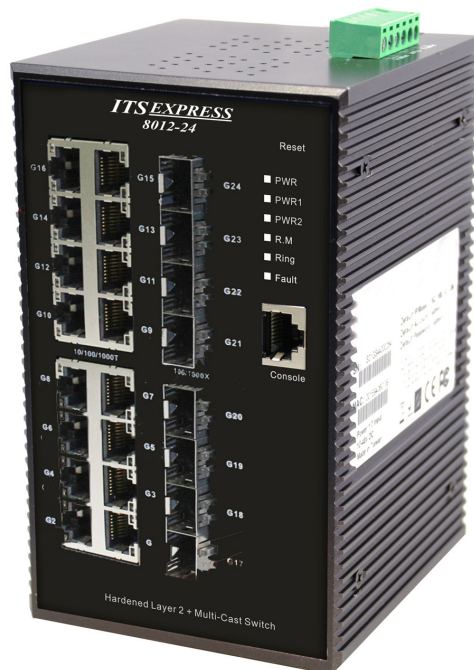

Two Optics are Included with each switch.
